Federal Registration

Herbanatur represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act.

This product is classified under EPA (25b) criteria and has not been registered by the US Environmental Protection Agency.

Ingredients

A.D.I.O.S.™ READY TO USE SOLUTION (RTU)
Active ingredient: Sodium Chloride ………………………………………………………11.87 %
Other ingredients: Potassium Chloride, Sodium bicarbonate, Potassium bicarbonate, water……………………………………………………………………………………………..88.13 %

Description

A.D.I.O.S.™ is a post-emergent eco-friendly foliar herbicide used for the control of broadleaf weeds.

This non-toxic and odorless selective weed killer can be safely use on turf & lawn or around plants, bushes, small trees, fruits and vegetables gardens.

Once sprayed on the weed, A.D.I.O.S.™ travels right away through the foliage, stems and all the way down to the roots.

A systemic reaction provides a rapid desiccation of the weed due to rapid loss of water from the plant cells. Visible signs of control may be seen shortly after the application.

All natural, A.D.I.O.S.™ is safe to be used around children and pets. No buffer zone is required when applied next to drinkable fresh water wells or bodies of water.

Preparation

A.D.I.O.S.™ READY TO USE: Do not dilute. Do not use through a hose end lawn sprayer.
SHAKE WELL BEFORE USING

Direction for use

Shake well and spray A.D.I.O.S.™ directly on the aerial parts of the weed using a coarse nozzle setting until foliage and stems are thoroughly wetted to the point of runoff.

Visible signs of control may be seen within several hours after application. Susceptible weeds will turn brown or black.

One application will suppress most annual, bi-annual and perennial broadleaf weeds.

Repeat treatment after a week if necessary.

First Aid

IF IN EYES: Flush with water for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a physician if irritation persists.

IF SWALLOWED: Rinse mouth out with water. Call a doctor or get medical attention as soon as possible. Do not induce vomiting. Do not give anything by mouth to an unconscious person.

Chemical Safety Information: Call 1-800-535-5053 Anytime (InfoTrac Chemical Response System).
**Pests**

A.D.I.O.S.™ will control many type of broadleaf weeds. This eco-friendly solution is effective at all stages of growth. However, best results are obtained if used while weeds are still small.

Only one application is usually needed to kill annual broadleaf weed.

Bi-annual, woody perennial weeds and mature weeds may require a higher application volume or a second application.

Perennial species with rhizomes like Poison ivy, Poison oak, Sumac, Giant hogweed and Japanese knotweed may require several applications.

We recommend to use A.D.I.O.S.™ **CONCENTRATED** solution to get rid of tough perennial species.

**Dandelion:**

To ensure dandelion root kill, make sure some A.D.I.O.S.™ accumulates [pools] in the center of the crown as well as covers the leaves. For lawns, best results occur when applied shortly after mowing.

---

**Lawn & Turf use**

A.D.I.O.S.™ is safe for use on lawn turf consisting of one or more of Kentucky bluegrass, perennial ryegrass, and fescue (tall fescue, chewing fescue, and/or creeping fescue).

Occasionally the grass can turn pale after treatment; however it will recover within a few days.

A.D.I.O.S.™ does not affect the health of the grass.

**Do not apply to drought stressed grass.**

If unsure of grass sensitivity, test spray a small area of your lawn. Apply to establish turf only. Avoid putting too much product on the grass.

Do not apply A.D.I.O.S.™ to newly seeded areas or to turf generated from seed that is less than one year old.

Avoid spraying desirable plants. Any desirable plants or structures accidentally contacted should be rinsed with water.

---

**Conditions**

**MIX WELL BEFORE USING**

Apply on the aerial part of the weed to the point of runoff. **Complete foliage coverage is essential to achieve suppression of the targeted weeds.**

A.D.I.O.S.™ can be used 1 hour after rainfall.

Do not apply in rainy conditions or if rain is forecast within the next 4 hours. **Do not irrigate within 24 hours of application.**

Some re-growth may occur following application made under less than favourable conditions.

**CLIMATE**

**Continental & Mediterranean:**

For OPTIMAL results, apply A.D.I.O.S.™ under sunny conditions when ambient temperature is at least 60°F.

**Tropical & subtropical:**

For OPTIMAL results, apply A.D.I.O.S.™ early in the morning or during the evening when ambient temperature is between 60°F and 80°F.

**Dry (arid & semiarid):**

For OPTIMAL results, apply A.D.I.O.S.™ late evening or at night time when ambient temperature is between 60°F and 80°F.

---

**Product overview**

A.D.I.O.S.™ **READY TO USE**

- Odorless, non-toxic & Fast acting
- Turf & Lawn safe
- Systemic solution (Kills to the root)
- Fertilizer component solution
- No residual activity in the soil.
- Pets and livestock friendly
- Meets USDA organic standard
- Approved for Use in Organic Production & Gardening
